

## **Junior Energy Inspectors are visiting an energy-autonomous house**

Pupils taking part at the “Junior Energy Inspectors in Action” project, visited the energy-autonomous house of Mr. Daskalopoulos and Mrs Vouzara.

Their house has a solar panel system of 4X180W, wind generator of 200W, energy saving fire-place and energy saving lighting system. The Daskalopoulos family is efficiently using electrical appliances by reasonably employing natural resources. The family is not scarifying the comforts found in modern homes, and does not perceive energy as an asset in ambiance to be wasted unreasonably.

Mr. Daskalopoulos is explaining to the pupils the benefits of employing natural energy resources. .

Junior Energy Inspectors thank Mrs Vouzara for her “maximum-energy” hospitality.
